DIPACCI COFFEE COMPANY

***We are the
Australian Distributor
for Dip Grinders***

Dipacci Coffee Company is the official Australian distributor for Dip Grinders. Dip grinders are manufactured and produced in Romania and Dip is the largest manufacturer of coffee grinders in Europe and the Middle East. We currently have the entire Dip Grinders range in stock and available for retail and wholesale purchase.

Designed For Easy Functioning

Every single machine that goes out from the factory is carefully tested in order to ensure long term functionality. The grinders are designed for easy functioning and maintenance, making them every roasters or coffee shops best friend.

Dip products do not claim, but prove their devotion to perfect grinding. All Dip grinders, have been oriented to work simply and efficiently without compromising the grinding quality.

From the very foundation of the company, Dip insisted on producing every core component of the machines inside the factory. To support this principle, all tolls and moulds are designed and produced by Dip, being designed with respect to the principles of proper engineering.
